

INTRODUCING

GBC®

FOTON® 30

RELOADABLE CARTRIDGE

Better for Environment

Previous Waste

No Recycled material used

Better Solution For The Environment

- Foton refill carrier made from 85% recycled material.
- Reloadable cartridges produce less waste than the standard cartridge with each film replacement.
- Reloading cartridges is easy – once film finishes, reload with a refill pack of the same thickness. Simply open the locking arms, place film and plastic transfer piece into carrier and close the locking arms.

SIMPLY CHANGE FILM

EASY TO LOAD

PRE-LOADED WITH FILM

1. Purchase Reloadable Cartridge & Film Set – 25179439 for 75mic and 25179436 for 125mic.
2. Once the film is finished, keep the plastic casing, and order the same thickness in refills – 25179437 for 75mic and 2519435 for 125mic.
3. If customer uses both they will need to buy both cartridges & film.
