GREAT / DIVIDERS

First modular screen system allowing you to add or subtract panel to suit your space.

Great Dividers are a brand new rolling wall system for flexibly dividing space and providing effective visual and acoustic barriers from Sylex Ergonomics. While providing excellent space division, when not being used they simply fold up and roll-away in seconds into a compact and storable unit.

Great Dividers are a completely modular system allowing you to add panels to create the length of divide you need; up to 7.3 metres long. For even longer configurations units can be ganged-together.
Great Dividers come in two heights 1810mm high (6 foot) or 2438mm high (8 foot). While the most popular version is the blue fabric wall there is also the option of a pair of dry-erase whiteboard wall panels.

Great Divider fabric panels are pinnable with a soft substrate, which also aids sound attenuation.

STARTER PANEL

The base unit is the Starter Panel which come ready to use and consists of 3 wall panels (2x850mm & 1x820mm wide) and two perpendicular end panels (700mm wide). Starter panels are complete and ready to use, or ready to be added to with add-on panels. The end panels of starter sets include locking casters for added stability. The castors are attached to 18-gauge steel legs with an innovative spring suspension system that keeps the panels level on any surface.

Starter panels

ADD-ON PANELS

Add-on panels come in hinged pairs each panel measuring 813mm wide. Like the starter panels there are two heights 1828mm high (6 foot) or 2438mm high (8 foot). The optional dry erase whiteboard features a high pressure laminate dry erase surface that provides smooth writability, easy erasability and exceptional durability.

Add-On panels - blue fabric

Add-On panels - white board

Sizes and configurations

Up to 3 pairs of add-on panels can be joined to each starter kit to create large format flexible walls, up to 7.3m long. For even longer configurations units can be ganged-together. A 4 piece ganging kit links sets together. One set of four is required for each pair of end panels to be joined together.
