

Hemmed Cotton Gloves

100% Cotton Interlock Men and Ladies Gloves Hemmed

Hemmed cotton cuffs provide a non-elastic wrist finish designed to maximise comfort, breathability, and ease of use in light-duty applications. Unlike knitted cuffs, hemmed cuffs do not apply compression around the wrist, reducing pressure and improving circulation during extended wear.

Manufactured from 100% cotton, hemmed cuffs are ideal for users with sensitive skin, as they contain no elastomeric fibres that may cause irritation. The open cuff design also improves airflow at the wrist, supporting thermal comfort in warm or humid environments.

The wider, non-elastic opening allows for faster donning and removal, making hemmed cuff gloves well suited to inspection, cleaning, food handling, and other hygiene-focused tasks where efficiency is important.

Hemmed cuffs maintain their shape after repeated washing, offering consistent fit and durability in reusable glove programs. The smooth cuff edge also reduces lint build-up, supporting cleaner use in food processing and hygiene-sensitive workplaces.

1. Cotton hemmed cuff gloves are made from 100% cotton fibers
2. They provide basic hand protection against dirt, dust, and minor abrasions.
3. Cotton hemmed cuff gloves are often used in industries such as food processing and handling, general manufacturing, and light assembly work.
4. They are reusable and can be washed and reused multiple times.
